

Supply Chain Management Solutions

Asset

Automate, Manage and Track Assets From Anywhere With 360-Degree Precision

25 Million
Assets Tracked Globally,
24/7

\$3.5 Billion
Transactions per Month

Apptricity Supply Chain Management is an integrated software solution suite that brings a new level of efficiency to your organization's management of assets, inventory, warehouse, yard and transportation operations. By streamlining and automating end-to-end management, you gain complete visibility and control, saving both time and money in real-time.

Apptricity Asset provides the 360-degree visibility and control across the life cycle of every asset. It's a unified suite of modules that integrates seamlessly with your existing ERP systems to enable granular detail specific to: maintenance repair, product warranties, lifecycle management, incident reporting (with the ability to track cost), department allocations, and depreciation. Now you can manage assets across your organization by employee, location and other variables, with online incident reporting that documents problems, tracks defects and provides valuable information to determine asset life.

Get Minute-by-Minute Visibility

When your organization can see asset status and location, it's amazing how things change. Stockpiling and shortages decrease, warranties are invoked, maintenance gets done on schedule. Accountability and efficiency improve – dramatically.

Unrestricted Configuration

Apptricity applications are designed to adapt to your environment, so you don't have to adapt to ours, thanks in part to our business rules engine, workflow and integrated administrative tools.

Asset Tracking With 360° Visibility

Put simply, Apptricity Asset allows you to track assets across the enterprise, in the field or across the world, with precision. We help organizations such as the U.S. Army and Nestlé track assets around the globe—imagine what we can do for you.

www.apptricity.com

Apptricity is a leading global provider of IoT and M2M mobile enterprise solutions for supply chain management and spend management.

Asset Life Cycle Management

Track assets when received, assigned, maintained or retired, including status by location and assignment to employees. You can even add, transfer and assign assets in a batch, rather than individually, for faster asset management.

Mobile Asset Tracking

Apptricity Asset communicates with barcode scanners and tracks assets and inventory with precision with RFID, LTE and Satellite tags. With real-time location services (RTLS), we help deliver unprecedented 360-degree visibility.

Intelligent Analytics & Reporting

Now you can track the value and useful life of your assets with real data. With graphical lifecycle and depreciation information, you'll get real-time visibility into asset valuation and remaining service.

Integrated Inventory Control

Mobile inventory management and web-based asset tracking combine to create a single view of company owned goods. Receive and move inventory in real-time.

End-to-End Field Service Management

Apptricity Asset and Inventory integrates with Apptricity Work Order to manage assets in the field and support MR&O processes. Collectively they manage receiving, movement and adjustments, and tie inventory to assets to work orders.

Top Rated Support Team

Our customers consistently rate Apptricity as "Superior for Technical Support" in independent studies by Dun & Bradstreet. We stand apart with dedicated personal support and frontline expertise, 100% based in the United States.

Why Apptricity Supply Chain

- + Global companies and government agencies rely on Apptricity to automate their Supply Chain and Spend / procurement processes to improve ROI.
- + Regardless of sector, industry or application, Apptricity solutions are easiest to own, deploy, integrate, modify, use, and afford.
- + Only Apptricity offers a flexible platform that mitigates risk with an Instant Pilot.™ Discover how fast and smooth an Apptricity deployment can be for your organization.

Total Integration with Every Solution

Our software integrates with any Enterprise Resource Planning (ERP) system, including Oracle, SAP, Banner, PeopleSoft, Lawson, Epicor, Sage and QuickBooks. We also will quickly develop custom interfaces for your other systems. Through Agile implementation, you have the choice of either on-premise or SaaS model, which dramatically speeds up implementation.

Take a closer look at how organizations like yours are leveraging automated Supply Chain Management to get ahead of their competitors, make more informed decisions and improve their ROI. Schedule a demo today by calling (800) 693-2193.
