

Supply Chain Management Solutions

## Inventory

### Expand Supply Chain Control with Comprehensive Inventory Management

---

“With this innovation, we now offer the ultimate in transparency, efficiency and accuracy—anytime, anywhere. We are pleased to make this investment in achieving peak performance for our customers.”

- CEO,  
Retail Service Provider Company

Apptricity Supply Chain Management (SCM) is an integrated software solution suite that brings a new level of efficiency to your organization's management of assets, inventory, field service and warehouse operations. By streamlining and automating end-to-end management, Apptricity SCM saves you both time and money while giving you complete visibility and control, all in real-time.

Designed with you in mind, Apptricity Inventory delivers true value by providing 360-degree visibility. The solution tracks quantity, location, shelf-life, and expiration information and ensures inventory replenishment according to company threshold limits that you set. With real-time business intelligence data and reporting, you're aware of inventory levels at every location, which will aid in eliminating costly mistakes and overstocking.

#### Gain 360-Degree Inventory Visibility

Improve operational efficiency with greater inventory insight and visibility. Centralized, up-to-the-minute data helps you maintain control as inventory moves to a new location or through the supply chain. Our solution also enables at-a-glance visibility and tracking for products, parts-on-hand, supplies and materials. This simplifies the reordering process, enhances accuracy and provides a comprehensive view of inventory availability and location.

#### Streamline Processes

Apptricity Inventory enables you to simplify and streamline your inventory management processes. You can optimize your inventory by automating manual processes and managing shipped goods using real-time exception reporting. Accurate tracking enables you to make better purchasing decisions and

minimize misdirected and misplaced inventory. You can seamlessly add Apptricity components as needed for a comprehensive, integrated mobile inventory solution that automates processes across your entire enterprise.

## Establish an Automated, Configurable System

Apptricity is built upon a proven technology framework, enabling unprecedented adaptability and user configuration capabilities based on your requirements.

Due to advanced service-oriented architecture (SOA), our applications allow you to seamlessly add components as needed. The result is a comprehensive, integrated inventory system that automates processes across the entire enterprise.

Inventory employs industry best practices to streamline daily operations for facilities of any size,

including distribution centers, storage locations, manufacturing facilities and retail stores. The solution can be deployed as a perpetual license for maximum internal control or in a Software as a Service (SaaS) model for organizations wanting this convenience.

## Perform Warehouse Activities Efficiently

Apptricity Inventory accommodates manual entry, electronic data interchange (EDI), advanced shipment notification (ASN) and radio-frequency identification (RFID).

RFID compatibility enables the solution to accept input from handheld RF devices that are used for warehouse tracking. Handheld RF devices enable you to process the arrival and receipt of inbound loads, track their whereabouts and move inventory items within the same facility or across multiple locations.

## Capitalize on the Benefits of Automation through Apptricity

- + Improve inventory accuracy and efficiency
- + Reduce labor and storage costs by maintaining optimal inventory levels
- + Add product quality assurance by monitoring shelf-life and expiration
- + Speed fulfillment and eliminate slowdowns caused by backorders, stockouts and shortages
- + Integrate with existing legacy systems, including ordering applications and accounting systems
- + Full mobile support, including iOS®, Android® and Windows Phone® devices

### Streamline Operational Efficiency

- Improve accuracy with optimization of replenishment points and lead times
- Integrate with point-of-sale applications
- Track item status, including raw materials, work in progress, finished goods and goods for resale
- Encompass hundreds of locations across your enterprise or just a single storage facility
- Simplify inventory searches using multiple categories for optimal efficiency

**Take a closer look at how organizations like yours are leveraging automated Supply Chain Management to get ahead of their competitors, make more informed decisions and improve their ROI. Schedule a demo today by calling (800) 693-2193.**
